

ATN universities are Australia's five real-world universities focused on enterprise, impact and finding solutions to issues facing our economy and society. Our member universities are Curtin University, Deakin University, RMIT University, University of South Australia, and University of Technology Sydney.

THE ATN ADVANTAGE

The Australian Technology Network of Universities (ATN) brings together Australia's five real world universities focused on enterprise, impact and finding solutions to issues facing our economy and society. Our member universities are Deakin University, Curtin University, RMIT University, University of South Australia, and University of Technology Sydney.

Our universities produce Australia's most job-ready graduates and undertake world-class research with real-world impact, seeking to find solutions to the world's most wicked problems. Through our innovation we are proud disruptors challenging the status quo and ensuring we continue to meet the needs of a rapidly changing economy and society. Together, we are proud of who we include, not exclude, with a strong commitment to equity, excellence and social justice.

Established in 1999, ATN is one of Australia's leading university peak bodies with a track record of advocating and shaping positive policy outcomes with all levels of government. The Directorate is led by Executive Director Luke Sheehy and is based in Canberra.

of our research is ranked world-standard or above (ARC ERA ratings 2018)
